Skills

- Next.js, React, TypeScript, JavaScript, Golang, Python, NestJS, Vue, React Native, Node.js, SQL (PostgreSQL), NoSQL (Redis, MongoDB)
- AWS, GCP, Terraform (IaC), Docker, CI/CD (GitLab), Blacksmith, IA Integration (Claude, GPT, Exa), OpenClaw, Bash, Event-Driven
- Datadog, Grafana, CMS, Microservices, Microfrontends, Distributed Systems, Frontend, Backend, Full-Stack, English, Spanish, Japanese

Experience

Software Engineer

FullTimeForce

Ohio, US

10/2023 - Present

- **Architecture & Performance:** Spearheaded the migration from **React** to **Next.js**, achieving a **55% speed increase** and **80% reduction** in initial load times, directly boosting user retention and sales.
- **Real-Time Backend & IA:** Built a high-performance community chat using **NestJS** and **Redis** (<150ms latency). Integrated AI models (**Claude**, **GPT**, **Exa**) and **OpenClaw** to automate internal workflows.
- **Infrastructure & Observability:** Streamlined deployments using **Blacksmith** and **Docker**; implemented comprehensive system monitoring and alerting with **Datadog** and **Grafana**.
- **Fintech & Growth:** Executed financial integrations with **Morningstar**, **TradingView**, and **Stripe**. Led **Technical SEO** strategy, significantly increasing organic traffic and conversion rates.

Software Analyst

ISP Consulting

Lima, Peru

02/2023 - 10/2023

- **Cloud Architecture & Logistics:** Built **React**-based platforms and **Serverless (GCP)** microservices to optimize logistics for major retailers; spearheaded on-premise to cloud migrations focused on scalability and cost-efficiency.
- **Full-stack & Backend:** Developed automation tools using **C#**, **Azure**, and **Cloud Functions**. Optimized database performance through stored procedures and implemented **event-driven architectures**.

Software Engineer

Truora

Cali, Colombia

10/2022 - 02/2023

- **Infrastructure as Code (IaC):** Architected and provisioned **AWS** resources using **Terraform**, streamlining deployment and testing environments for maximum consistency.
- **DevOps & ChatOps:** Developed **Golang** and **AWS Lambda** microservices for deployment automation; managed containerized environments with **Docker**, **Bash**, and **YAML** incorporating rigorous unit testing.

Software Engineer

Glup

Lima, Peru

02/2022 - 10/2022

- **IoT & E-commerce:** Developed a **React** platform for real-time IoT air monitoring. Optimized **Shopify/WordPress** architectures for high-pressure sales events, driving a **200% revenue increase** through high-traffic management.
- **Cloud & Backend:** Managed deployments on **AWS (CloudFront)** with **GitLab CI/CD** pipelines. Integrated **Machine Learning** models for UI personalization and automated background processing tasks.

Software Engineer, Intern

Bu Creativo

Lima, Peru

09/2021 - 02/2022

- **HealthTech:** Developed high-scale **Next.js** applications to digitize physician-patient communication, optimizing clinical workflows through virtual interfaces for remote consultations.

Education

Bachelor of Science

National Technological University

Lima, Peru

03/2019 - 12/2023

- Major in Computer Engineering

Projects

- **Foxbel Music:** Developed a fully responsive Spotify-like application in Vue for an interview test (07/2022)
- **Pokemon:** Built a TDD CRUD Typescript application with React for a one-day interview test (06/2022)
- **Portfolio:** Developed a NuxtJS Typescript application as a place to give reference to my projects and contact information (10/2022)

Courses

- **React Bootcamp:** Participated with dozens of developers in building a Credit Card service software with React (06/2021 - 07/2021)

Others

- **ICPNA:** Completed basic, intermediate and advanced English courses. Obtained a certificate of completion. (04/2023)
- **TOEFL ITP C1 Certificate of Achievement:** Demonstrated proficiency in English at the C1 level (Common European Framework of Reference for Languages) - (07/2023)
